Greenwich Oval Coffee Table

The Greenwich Oval Coffee Table takes the clean geometric language of the Greenwich console and reimagines it in the round, a design of considerable architectural complexity that reveals new layers of detail and composition the longer you spend with it. The base is a double-tiered oval structure of square steel, the upper ring connecting to the lower via a series of upright portal frames whose stepped, right-angled tops echo the precise geometric vocabulary of the Greenwich family with perfect consistency, each one a small piece of considered design that contributes to the overall composition without ever announcing itself. The lower oval ring, curving continuously around the full circumference of the base at floor level, gives the piece a grounded, stable quality whilst keeping the overall silhouette light and open, a difficult balance that speaks of long hours of refinement in the studio. Finished in bitumen silver, the faces of the metalwork catch the light with a cool, luminous quality that shifts between pale champagne and deeper pewter tones as you move around the piece, the hand applied finish adding a warmth and variation that prevents the geometric forms from ever feeling cold or mechanical. The oval limestone top, its natural pale surface and gentle fossil-rich texture sitting in perfect harmony with the silver work beneath, crowns the composition with understated authority.

All pieces from our Somerset studio, are handmade to order to your exact specifications and available in bespoke sizes with a choice of finishes and tops.

* Dimensions are provided as a guide, all Adam Williams Design products are made by hand and variations may occur in some products. **Lead Time:** Approx. 8 weeks
