## Hammered Bronze Coffee Table With Shelf

The Hammered Bronze Coffee Table with Shelf is a piece about the relationship between the raw and the refined, between a frame of extraordinary tactile richness and the cool, transparent clarity of glass that it supports. The four legs are the defining element, each one built up with a deeply worked, almost encrusted surface texture that goes far beyond conventional hammering into something closer to the bark of a tree or the surface of weathered stone, a finish achieved through hours of hand working that gives the bronze a depth and three dimensionality that catches the light from every angle with a constantly shifting, earthy complexity. Set against this powerful surface, the clean rails of the frame and the two sheets of toughened glass, top and shelf, create a deliberate and entirely successful contrast of rough and smooth, dark and transparent, tactile and optical. The glass top allows the full drama of the textured legs to be appreciated from above, the eye travelling down through the surface to the shelf below and the floor beyond, making the piece feel open and light despite the considerable presence of the metalwork. The lower shelf adds a practical dimension without compromising the visual openness of the design.

All pieces from our Somerset studio, are handmade to order to your exact specifications and available in bespoke sizes with a choice of finishes and tops.
